

Archery Lane Use

The club's 40 yard archery range is located behind the dumpster to the left of the 7 yard pistol pit. There is a four target backstop complex with targets for shooting arrows and crossbow bolts equipped with field or broadhead points. Shooting line range markers and arrow holders have been placed to identify distances of 10, 15, 20, 25, 30, 35 and 40 yards.

Six (6) station bow hangers are situated to the right of the 20 and 40 yard range marks. These are intended to hold bows while retrieving arrows or waiting your turn at the shooting line. A chart is mounted on each bow hanger to indicate which target to use depending on your bow (traditional, compound or crossbow) and type of arrow point (field or broadhead).

PLEASE FOLLOW THESE INSTRUCTIONS.

If you intend to shoot broadhead points, use only the foam target on the left. Broadhead points will permanently damage the other targets.

The shooting of firearms at our archery targets is prohibited and is grounds for suspension of one's membership privileges.

Members with questions or comments regarding the archery lane should contact Bill Zide at wjzwjz@aol.com or 732-208-0308
